### PROCESS

This is a collaborative process where the client and the artist work together to discuss the best and preferred “view” of the house(s) or building(s), and any particular details and inclusions desired by the client.

Access to the site: Tanya prefers to have a “sitting” on site, where she will sketch and take her own photographs. Occasionally Tanya needs to have a second sitting.

In the case that access to the site is not possible, Tanya will ask for a number of good quality photographs from the client.

Tanya paints the finished painting from photographs in her studio. A common time frame is 6 weeks; when the commission is ordered, Tanya can give a more precise time frame.

The painting is delivered unframed, but Tanya is happy to give advice on framing, or to organize suitable framing.

For all enquiries and appointments, please contact Tanya directly by phone, email, or through her website.
